

Governing Climate Change Mitigation in New York City, Los Angeles, and Toronto

Climate change is one of the most pressing challenges facing our planet today. Cities are major contributors to climate change, but they are also at the forefront of efforts to mitigate its effects.

Repowering Cities: Governing Climate Change Mitigation in New York City, Los Angeles, and Toronto

This book explores the complex challenges and innovative solutions to governing climate change mitigation in three major North American cities: New York City, Los Angeles, and Toronto. These cities have all adopted ambitious climate change mitigation targets, but they face different challenges and have developed different approaches to achieving their goals.

The book draws on a variety of research methods, including interviews with city officials, climate change experts, and community leaders; analysis of

city policies and programs; and case studies of specific climate change mitigation projects.

The book finds that while there is no one-size-fits-all approach to governing climate change mitigation, there are some key factors that contribute to successful climate change mitigation efforts. These factors include:

- Strong political leadership
- A clear and ambitious climate change mitigation target
- A comprehensive climate change mitigation plan
- Adequate funding and resources
- Public support

The book also finds that cities can play a leadership role in climate change mitigation by:

- Adopting ambitious climate change mitigation targets
- Developing and implementing comprehensive climate change mitigation plans
- Providing financial and technical assistance to businesses and residents to help them reduce their greenhouse gas emissions
- Educating the public about climate change and the importance of climate change mitigation
- Advocating for national and international climate change policies

This book is a valuable resource for city officials, climate change experts, and community leaders who are working to address the challenges of climate change mitigation.

Table of Contents

2. Climate Change Mitigation in New York City
3. Climate Change Mitigation in Los Angeles
4. Climate Change Mitigation in Toronto
- 5.

Reviews

"This book provides a comprehensive and nuanced analysis of the challenges and opportunities of governing climate change mitigation in three major North American cities. It is a valuable resource for anyone interested in understanding how cities can play a leadership role in addressing this global challenge." - *Dr. Sara Hughes, Director of the Climate Change Policy Center at the University of California, Berkeley*

"This book is a must-read for anyone who wants to understand how cities can govern climate change mitigation. It provides a wealth of insights into the challenges and opportunities of climate change mitigation in three very different cities." - *Dr. David Dodman, Head of the Cities and Climate Change Unit at the World Bank*
