Chapter 1: Business and the Carbon Economy

Businesses have long been influential in shaping climate policies. As major emitters of greenhouse gases, they have a vested interest in influencing regulations that affect their operations and bottom lines. This chapter explores the strategies employed by businesses to delay, weaken, or block climate policies, often prioritizing short-term profits over long-term sustainability.

Chapter 2: Labor's Role in the Climate Transition

Organized labor represents another powerful stakeholder in climate politics. While some unions support climate action, others fear that job losses in carbon-intensive industries will outweigh any benefits. This chapter examines the complex factors influencing labor's stance on climate change and the challenges of balancing environmental concerns with economic security.

Chapter 3: Comparative Case Studies: Climate Politics in Different Contexts

To understand the nuances of climate politics, it is essential to examine how business and labor dynamics vary across different countries. This chapter presents case studies from the United States, Europe, and China, highlighting the unique challenges and opportunities in each context.

Chapter 4: The Path Forward: Navigating Business, Labor, and Policy Tensions

Striking a balance between the interests of business, labor, and the environment is a daunting task. This chapter explores potential solutions for overcoming these tensions, such as promoting technological innovation, supporting worker retraining programs, and fostering dialogue and collaboration among stakeholders.

: A Call to Action for a Just and Sustainable Future

"How Business and Labor Control Climate Politics: American and Comparative" provides a comprehensive analysis of the intricate web of power relations that shape climate policies. It is a timely and thought-provoking work that challenges the reader to consider the complexities of climate change and the urgent need for action. By fostering a deeper understanding of the role of business and labor in climate politics, we can empower ourselves to create a more just and sustainable future for generations to come.
